

Expert Advice Service for *in silico* toxicology

Want to ensure your *in silico* assessments have the best chance of being accepted by the regulators?

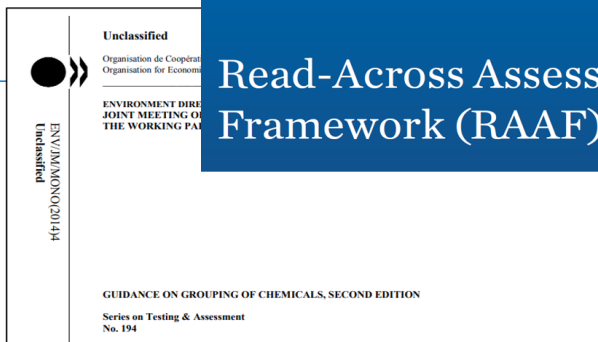

The Expert Advice Service is an annual subscription to provide coaching and advice from experts on (Q)SAR and read-across.

A Compendium of Case Studies
the REACH Guidance on Ch
and Read Acr

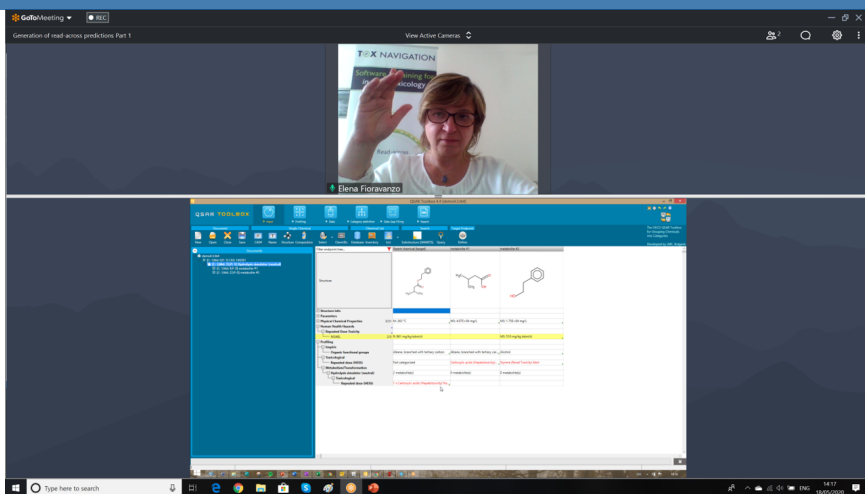

Read-Across Assessment Framework (RAAF)

- ◆ Peer review of your read-across
- ◆ Help desk to answer general questions on *in silico* methods for chemical hazard, risk and safety assessments
- ◆ Application help with the OECD QSAR Toolbox
- ◆ Updates on the latest developments of *in silico* methods for chemical hazard, risk and safety assessment
- ◆ 1 year's access for one person to "NAMs—Use and application of QSAR and read-across" eLearning resource

Why Subscribe?

- ◆ Choice of methodology and analogues for *in silico* assessments can be subjective. A peer review is a safety check
- ◆ Having a resource to answer questions quickly can save you time
- ◆ This subscription is a cost effective solution to always have access to up-to-date expertise and knowledge for your safety, hazard and risk assessments

The scientists at ToxNavigation have more than 25 years of experience in *in silico* modelling to predict the effects of chemicals on humans and in the environment and can generate **reliable safety data *in silico*** by combining results from (Q)SAR models, **chemical categories**, **grouping** and **read-across**

Cost for 2024

The annual subscription is **£3,550 per year** for a maximum of 30 hours of advice desk
